Introduction

MARIA-MM is a high-performance, feature-rich WhatsApp bot that allows you to automate messages, download media, use AI, and much more directly from your WhatsApp account. With our seamless Hosting Panel, you don't need any coding experience or expensive servers—you just paste a code, and your bot is online 24/7!

How It Works

1. Get Your Key: Use the official Pairing Page to securely link WhatsApp and generate your Session ID.
2. Deploy: Paste the Session ID into the Hosting Panel dashboard.
3. Enjoy: Type **.menu** in WhatsApp to start using the bot.

Step 1: Get Your Session ID

Visit the Pairing Website, enter your phone number, choose Pairing Code or QR Code, link your WhatsApp, receive your Session ID in WhatsApp, and copy it.

Step 2: Deploy Your Bot

Log into the Hosting Panel, open "Deploy Your Bot", paste your Session ID, and click "Start Bot Instance".

Step 3: Test Your Bot

After deployment, type **.menu** in WhatsApp to verify the bot is working.

Available Commands

.menu, **.alive**, **.sticker**, **.ai [question]**, **.ytmp3 [url]**, **.ytmp4 [url]**, **.github**, **.support**

Troubleshooting

Use a leading dot for commands, ensure the bot is Online in the Hosting Panel, regenerate expired pairing codes, and verify your phone remains connected until pairing completes.

Terms & Policies

Use MARIA-MM lawfully. Session IDs are only used for connection. We aim for 99.9% uptime but cannot guarantee uninterrupted service. Donations are non-refundable. Bot instances violating policy may be terminated.
